

JD MOTORS

SUPPLY OF FITTINGS ONLY

RMP recently worked with JD Motors to supply their new LED light fittings and deliver substantial savings in energy costs.

John Ives Brown
Owner, JD Motors:

“Following positive recommendations, we decided to change our on-site light fittings with RMP.

From initial quotes through to final fittings the whole process was completely seamless, with RMP managing delivery schedules, amendments and project efficiency!

The outcome has far exceeded our expectations, with a brilliantly-lit workspace and the benefits of hugely reduced energy bills!”

For this project, we were tasked with replacing the client's existing and energy-hungry Fluorescent Tube Fittings with Low Energy, High Output **LED Battens**.

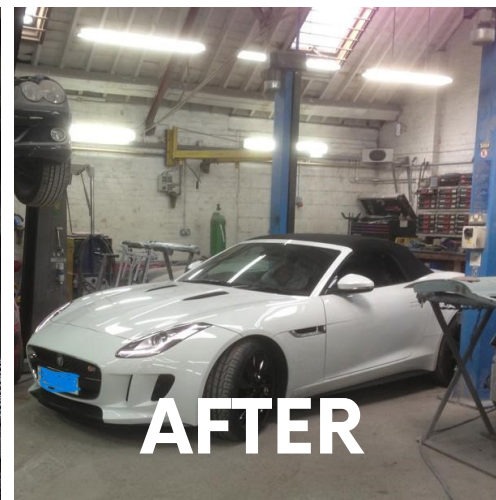

Each fitting comes with its own **microwave sensors**, meaning lights step down and switch off when no presence is detected.

We chose to use one of our long established preferred manufacturers, offering our client a full 7-year warranty, the first 2 years being an on-site presence.

The project has resulted in a reduction in energy costs of more than 75%.
